EDUCATION

JIET, JODHPUR B.TECH

Computer Science

Aug 2021 -- Apr 2025

SKILLS

DEVOPS

• Azure DevOps • CI/CD • Release Management • Pipeline Management

CLOUD PLATFORM

Microsoft Azure

VERSION CONTROLLING

• Git • GitHub

INFRASTRUCTURE AS CODE (IAC)

• Terraform • PowerShell

AI & DEVELOPER TOOLS

• Claude Code • GitHub Copilot

LANGUAGES

• Python • C • C++ • HCL

CERTIFICATIONS

- Azure Fundamentals
- Azure Developer Associate
- Azure Administrator Associate
- Docker & Kubernetes Fundamentals
- Research Trainee: Machine Learning

LANGUAGES

•Hind • English

INTERESTS

Cloud • Coding • Singing • Football • Gaming

EXPERIENCE - 2 YEARS

CELEBAL TECHNOLOGIES | CLOUD ENGINEER

Apr 2024 -- Present | Jaipur

- Managed Azure services (VMs, Storage, Networking, Security) and contributed to Landing Zone setup.
- Worked with Azure Integration & AI Services; built IaC using Terraform and automated tasks with PowerShell.
- Implemented security using Microsoft Entra ID (RBAC, identity, access management).

ZEETRON NETWORKS | DATA SCIENTIST INTERN

May 2023 -- Jun 2023 | Jaipur

- Applied Python (NumPy, Pandas, Matplotlib) for real-world data analysis.

JIET | SAS ANALYST TRAINEE

Jan 2022 -- Dec 2022 | Jodhpur

- Used SAS for analytics, visual representation, and data-driven insights.

PROJECTS

DATABRICKS INFRASTRUCTURE AUTOMATION |

AUTOMATION ENGINEER

Oct 2025 -- Dec 2025

- Automated provisioning and configuration of Azure services for Databricks (Logic Apps, API Management, Event Hub, clusters, VMs, storage), reducing manual effort and speeding up deployments.
- Implemented version control and Terraform-based IaC with private connectivity, improving security, consistency, and maintainability across environments.

INTERNAL PRODUCT (CELEBAL) | INFRA SUPPORT ENGINEER

- Designed and maintained secure connectivity across Azure PaaS and IaaS services, implementing Managed Identities for reliable inter-service access.
- Configured RBAC and automated authentication using Service Principals, enabling secure access for applications and CI/CD pipelines.

AI OMNI-RETRIEVER | AI INFRA ENGINEER

- Designed and implemented a RAG-based conversational AI on Azure using OpenAI, AI Search, and Document Intelligence to deliver accurate, context-aware responses from enterprise data.
- Enhanced interactions with Azure Language Service for intent detection and intelligent workflow routing.

DATA PLATFORM (HAYYA QATAR) | CLOUD AI ENGINEER

- Built a unified Azure data & AI platform for Hayya Qatar, enabling real-time KPIs and centralized analytics.
- Developed a conversational layer using Azure OpenAI and Cognitive Search to convert natural language into SQL insights and visualizations.
